

Chaser Bin Weighing Kit

Description

This Chaser Bin weighing kit consists of 4* OWL12 load cells (2t / 3t/ 5t capacity), a stainless steel junction box, 10m cable and a weight indicator. The standard weight indicator has an ABS plastic casing. The indicator has internal rechargeable battery and works on 12V DC and is supplied with a 230V AC/ 12V power adapter. The indicator can also work from the vehicle's 12V DC battery.

Although the kit is with four load cells, based on the geometry of the vehicle , six or eight load cells may be needed. Stainless steel indicator or wireless indicators are available as options.

The OWL12 load cell is a Stainless steel double ended shear beam load cell sealed to IP67rating, ideally suited to onboard vehicle weighing where side and angular loading in possible.

The OWL12 load cell can also be used in standard weighing installations where a rigid connection is required to keep the load in place and can support various axles or bearings in industrial weighing or for weighing a tank, silo or hopper.

Specifications

Part Number	Recommended Capaci-	Items in the Kit
OWL12 - 5000kg kit	5000kg * 2kg	OWL12 Kit with 4* load cell capacity 2t, Jn Box, 10m Cable and Weight Indicator
OWL12 - 7500kg kit	7500kg * 5kg	OWL12 Kit with 4* load cell capacity 3t, Jn Box, 10m Cable and Weight Indicator
OWL12 - 12000kg kit	12000kg*10kg	OWL12 Kit with 4* load cell capacity 5t, Jn Box, 10m Cable and Weight Indicator
