

Description

Junction Boxes which is also known as summing boxes, are used in multi-load cell installations. The junction box keep all cables tidy and only require one cable to be attached the indicator, making wiring into the connectors an easier task. Junction boxes are provided with potentiometers for corner adjustments for precision weighing, to compensate for the signal tolerance between load cells.

Features

- Supports up to 4 load cells
- Stainless Steel Body
- Signal Trim
- IP66 Rating
- Water Tight Cable Glands
- Corner adjustment by Potentiometers
- Accepts cables from 3.5 mm to 7.0 mm in diameter
