

AWLP Shackle Weigher

Description

The AWLP load pin kit (Shackle weigher) is a superb product for suspension weighing and for measuring tension in cables and anchorages. The load pin is fitted to a Rated load shackle with sleeve and anti-rotation plate, fully assembled and ready to install. This kit is ideal for cranes, barges, sea anchors and general purpose load testing.

Available in weighing capacities 3t, 6.5t, 12t, 25t and 55t, all with industry standard shackles and high safe load the kit with a weight indicator in ABS body with internal rechargeable battery with 24 hours+ back up .

Stainless indicators are available as options.

The AWLP kit consists of:

- Fully sealed IP67 stainless steel load cell
- Rated shackle
- Anti-rotation plate
- Sleeves (bobbins)

Ideal for cranes, barges, sea anchors, load testing
